

Introducing: SIP Local and SIP Long Distance Services

TCO Network is pleased to announce the addition of **SIP Local and SIP Long Distance services** to our portfolio of Local and Long Distance services. SIP Local and SIP Long Distance services provide seamless integration of TCO's voice network services with IP-based phone systems. TCO's SIP services deliver local, toll-free, domestic and international long distance service through TCO Network's national footprint. Additionally, SIP Local and SIP Long Distance can be dynamically integrated with Internet and MPLS data network services over the same single network connection. With TCO's SIP Local and SIP Long Distance services, customers are able to realize efficient network utilization and simplify their network management strategies.

SIP Local

Access Options

Multiple access options are available throughout TCO's network footprint to meet each customer's bandwidth requirements, including DS1, NxDS1, DS3, Ethernet, and OCx.
